

Bovine Colostrum for Lupus: The Science

Colostrum is a special fluid secreted by the mammary glands of all mammals near the time of birthing. Its purpose is to promote good health in the newborn. Colostrum works for adults as well as infants. Colostrum for human use is harvested from dairy cattle after the calves have been given an amount adequate for their needs. Colostrum has been shown to substantially benefit persons with lupus.

The Science

"PRP from colostrum can work as a regulatory substance of the thymus gland. It has been demonstrated to improve or eliminate symptomatology of both allergies and autoimmune diseases (MS, rheumatoid arthritis, lupus, myasthenia gravis). PRP inhibits the overproduction of lymphocytes and T-cells and reduces the major symptoms of allergies and autoimmune disease: pain, swelling and inflammation." -- Dr. Zoltan Rona, *The American Journal of Natural Medicine*, March 1998.

"The ability to stimulate or suppress the immune response is highly significant. Suppressing the immune system is necessary to prevent the immune system from attacking the body itself, as in the case of autoimmune disease such as rheumatoid arthritis, lupus, MS, Alzheimer's disease and allergies. Colostrum's suppressive action may help prevent this type of activity involved in autoimmune diseases." --Beth Ley, PhD Nutrition

"Colostrum contains a special Proline-Rich-Polypeptide (PRP) that serves as a powerful regulator of the immune system. PRP in colostrum increases the permeability of the skin vessels, which offers a regulatory activity, stimulating or suppressing the immune response." (Staroscik)

Reports of Persons with Lupus

"I have been using your product for one month. Synertek, and bovine colostrum from your company have changed my life. I am in complete remission. My lupus is not apparent at all. I just wanted to say thank you, thank you, thank you, from the bottom of my heart." — Tracy Johnson, Greenville, SC

"I am delighted to grant you permission to use my comments in any way that will help others. I had been to numerous physicians and found only the tendency to give me pain killers. I reached the stage of total disability. When I began to take the colostrum supplement, my arms were sites of blisters and terrible itching pain. My photosensitivity had been such that I couldn't go out in my yard at all. This product has made my lupus go into remission. I no longer have the itchy skin and joint pain that had been so difficult to endure. I have been using the product since last February and now I can work in my yard again. I am doing all my own housework and Thank God, I can hold my newborn granddaughter without fear of her falling from my arms. Thank you so much. If I can help anyone at any time as they use this miracle, I will be happy to do so." Yours truly, Dr. Azalia S. Moore, Clinical Psychologist.

"My dad was diagnosed with Lupus in July, at Xmas he was pretty weak and having tremendous pain in his joints. He was also getting shots weekly to increase his white blood counts. Since taking colostrum

2x daily his days are much better. He is still getting the shots but not nearly as often. We think it is a result of the colostrum." — L. Dickerson, Bellefontaine, OH

"I have been using colostrum for 18 months. I have lupus and this product has made such a difference to my life. I feel fit, well, and can face each new day." — Kim Elliott, Essex, England

"I have been taking Colostrum for about two and a half weeks and I can already feel the difference in my energy level and less pain in my body. I was pre-diagnosed with Lupus and I had my biggest flare up back in march and lasted for months until they have put me on steroids. It helped a lot of my problems, but the fatigue was still very hard to handle. I never needed so much sleep before. When I found out about Colostrum, I felt like I have found the best way to help my body to heal. I am really enjoying taking it. In the future I wish to send some to my mom in Europe for her joint pain too. I am very thankful. — Suzanne, Seattle, WA

"I have lupus and I am already feeling the benefits of the colostrum."
— M. Perrine, Cape Canaveral FL

"As a lupus sufferer, colostrum has been a blessing to me. This is the first time in eight years that I have felt well enough to cook Christmas dinner." — M. Doss, Macon, Georgia

"I was a skeptic with an autoimmune disorder that acts like all of the big ones, but has yet to leave a fingerprint. After 2 months on these tasty little fellows, my energy level is much improved. I have less burning and tingling in my arms and legs. I also have less soreness in my muscles and joints. Some days are better than others, since I was virulently stricken with this "thing", but my quality of life has improved much since I have been consuming these little fellows. Two a day with no side effects." — M. Gresko, San Diego, CA
